ecoTEC exclusive with Green iQ 627

High efficiency
system boiler

SYSTEM BOILERS

What are the advantages?

System boilers need a cylinder to store hot water, but system components are built into the boiler itself, so there is no need for a tank in the loft.

System boilers are ideal for homes with multiple bathrooms and can give a constant supply of hot water to a number of taps at the same time.

With no need for a loft tank, system boilers free up space and eliminate worries about leaks or frost damage. They can also work with solar water heating systems and heat pumps, making a great entry into renewable heating solutions.

The built-in components of a system boiler make installation quicker and neater. Also, once installed, it is economical to run.

Key features

- The ecoTEC exclusive with Green iQ boiler has been awarded the Which? Best Buy 2016
- ErP A rated boiler with up to 95% efficiency, helping you to reduce carbon and save money on your fuel bills
- 85% recyclable
- Automatically adjusts to any type of gas
- Quality German design and engineering which is manufactured at award-winning UK facilities
- Designed for a peaceful home, the ecoTEC exclusive is awarded the Quiet Mark for its reduced noise
- Built-in heat recovery system to further reduce energy bills
- Compatible with Vaillant's vSMART™ app based control for heating on the go

ecoTEC exclusive with Green iQ 627

High efficiency system boiler

The ecoTEC exclusive with Green iQ system boiler can modulate its output from 27kW down to just 3kW, dramatically reducing fuel consumption and your energy bills.

All ecoTEC exclusive boilers offer low energy consumption and premium components to give outstanding performance. Each one is ultra-quiet, awarded the Quiet Mark for innovative reduced-noise design by the Noise Abatement Society, and designed for a peaceful home.

Dimensions	
Model	627
Boiler height (mm)	720
